StackGen

AI wrote your code. Aiden runs your ops.

StackGen is an Autonomous Operations Platform that eliminates engineering toil across the full post-coding lifecycle — so teams ship faster, resolve incidents in minutes, and govern infrastructure without manual effort.

The Vision — Autonomous Operations Across the Full Lifecycle

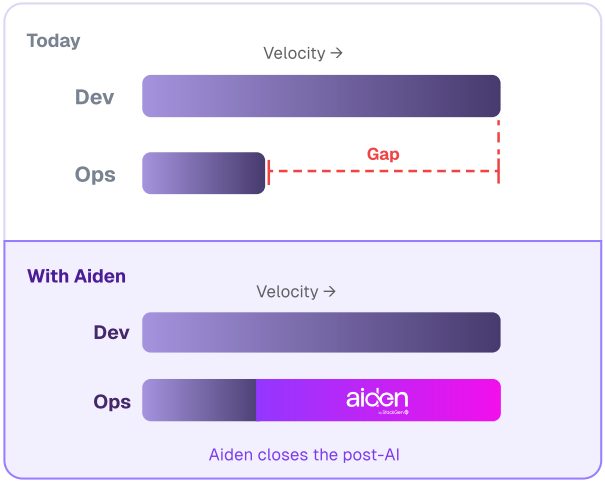

AI has transformed how software is written. Aiden is built to transform everything that comes after.

THE PROBLEM

As development accelerates, operations becomes the new bottleneck, where fragmented tools and processes create latency and manual handoffs across teams. The faster code ships, the worse the pressure on everything that follows.

OUR APPROACH

Aiden is the agentic AI layer across the full operations lifecycle, connecting your existing tools and executing changes across your environment, working alongside your team from infrastructure provisioning through to observability.

Platform Capabilities

AIDEN FOR INFRASTRUCTURE
10x provisioning velocity · 75% lower deployment cost · 100% compliance

AIDEN FOR SRE
50% MTTR reduction · 90% alert noise reduction

AIDEN FOR OBSERVABILITY
40%+ cost reduction · 2-5 FTEs reclaimed

AIDEN FOR DEVOPS
30% Fewer DevOps Tickets · 2.5x Faster Task Completion

Core Platform: Contextual Knowledge | Enterprise Guardrails | Deterministic Workflows | Infrastructure Graph | Sandboxed Execution
